ADAMAS UNIVERSITY, BARASAT  
2022-Present

Motivated college student seeking internship.  
Dedicated to learning new skills and bringing  
innovative solutions to diverse professional  
settings.

## WORK HISTORY

### MACHINE LEARNING USING PYTHON

Workshop and Internship

February 2023-April 2023

- Participated in an immersive workshop and online internship program focused on Machine Learning utilizing Python, facilitated by Pregrad.
- This experience was invaluable, offering a deep dive into the intricacies of Machine Learning.
- Collaborating with a dynamic team of peers was truly inspiring, amplifying my enthusiasm for the subject. Through hands-on projects and mentorship,
- I honed my proficiency in Python and advanced my understanding of Machine Learning algorithms and methodologies. This opportunity not only expanded my skill set but also ignited a passion for leveraging data-driven solutions in real-world scenarios.

## EXTRA CIRRICULAR ACTIVITIES

- |                    |                                                                                                      |
|--------------------|------------------------------------------------------------------------------------------------------|
| 09-2022            | Webinar on Robotics and Artificial Intelligence organised by Adamas University, Kolkata              |
| 01-2023 to 05-2023 | Startup India Learning Course by Wadhvani Entrepreneur                                               |
